DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a TV based system with controlling an on-screen display mechanism in the STB to interact with the user, classified in class 725, subclass 52.
 - II. Claim 2, drawn to a source and receiver with latency, classified in class 725, subclass 136.
 - III. Claims 3-13, drawn to outputting video signals at a receiver with the receiver outputting video signals to display the second image over the first image to provide visual feedback, classified in class 348, subclass 589.
 - IV. Claims 14-18, drawn to a method in an audiovideo transmission environment for purchasing, classified in class 725, subclass 110.
 - V. Claims 26-28, drawn to a receiver with receiving data indicating that a page is no longer displayed, classified in class 725, subclass 110.

- VI. Claim 29, drawn to a receiver with receiving an explicit user command to submit information to the server, classified in class 725, subclass 110.
- VII. Claims 30-31, drawn to a head-end source and client with enabling an STB to receive data corresponding to an email, classified in class 725, subclass 110.
- VIII. Claims 33-36, drawn to drawing focus on the default link by superimposing a second image over the first image, classified in class 348, subclass 589.
- IX. Claims 38-39, drawn to in response to the interactive command, updating a second image superimposed over a separate read-only field, classified in class 348, subclass 589.
- X. Claim 19, drawn to a method of representing user interaction with video image with receiving a substantially static, high-quality image, classified in class 348, subclass 590.
- XI. Claims 20-22, drawn to a server and client with changing a page and controlling a slide show, classified in class 725, subclass 116.

- XII. Claims 40-41, drawn to providing a new page of content for a carousel of pages, classified in class 725, subclass 116.
- XIII. Claim 46, drawn to selecting a first page of a plurality of pages based on at least one criterion, classified in class 725, subclass 116.
- XIV. Claims 23-25, drawn to audiovideo data transmitted from a source with if selection lacks an associated time, tuning to a channel, classified in class 725, subclass 61.
- XV. Claim 32, drawn to a receiver with determining whether the channel to which the receiver is tuned is a subscriber channel, classified in class 725, subclass 27.
- XVI. Claim 37, drawn to a receiver with in response to an interactive command, processing the page including interpreting the metadata, classified in class 725, subclass 38.
- XVII. Claim 42, drawn to a computer-implemented method with the first phase post-processing tool providing output data to a second phase post-processing tool, classified in class 348, subclass 581.

XVIII. Claims 43-45, drawn to a head-end source and a receiver with each transmitted page comprises at least one block of encoded data, classified in class 725, subclass 109.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-XVIII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, the search required for one subcombination is not required by any of the other subcombinations. See MPEP § 806.05(d).

Conclusion

4. A telephone call was made to Albert S. Michalik on 2/9/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
